Continuation to the Process

Joint Statement on Development of Inland Navigation and Environmental Sustainability in the Danube River Basin

Workshop I Results

Strong support by all participants to this Danube IWT process

Cooperation between Basin and Navigation Commissions is proven as mutually beneficial

River ecology requires a very dynamic landscape and is seriously deteriorated along the Danube

IWT is an envir.-friendly transport and has a growing market

Danube IWT has to respect the legal framework (WFD, FFH)

Workshop I Results

- Danube river landscape has to serve many functions, i.a.
 IWT
- Each river section has its individual character and needs its own management and development
- Danube has free capacities for IWT but needs to respect and adapt to the river ecology
- IWT projects should not further deteriorate the riverine landscape but aim at improving/restoring it (e.g. GES)
- IWT projects need to be multi-functional and multidisciplinary: a thorough preparatory process (planning guidelines) can lead to win-win situations

Workshop I Results:

Issues to follow up

- Waterway maintenance: What are possibilities to improve execution?
- New infrastructure projects: How to optimise the quality and dimension of the waterway re. ecology <u>and</u> navigability?
- How to address the lack of coordination and harmonisation between WFD and national waterway projects (NAP)?
- Establish a list of waterway projects in the Danube basin
- Look at and assess concrete IWT cases in other river areas (lower Danube, Sava)

The Process

The process has three steps

- Workshop 1 Initial Facts and Exchange of Views and Experiences; visit of first example site
- Workshop 2 Agreeing upon technical ways to achieve ecology-friendly IWT; visit of second example site
- Workshop 3 Drafting the Joint Statement including the agreed findings

The Further Process

The process involves 3 Workshops

- April 25-26, Austria: Report will soon be available
- June 25-26, Romania: Arrive on Sunday 24 June!
- October 4-5, Croatia

Thank you for your attention
